ibo primo (9.8.0.230033) 2022 (9.8.0.230033) Lists Video and sound files Category:Navigation systems Category:GPS-related listsQ: Parsing raw data in input (data.file = "config.xml") I tried to parse the following raw data in input with the following code var request = new XMLHttpRequest(); request.open("POST", ""); request.send(null); but i always get a error in line 2 XMLHttpRequest cannot load Origin null is not allowed by protocol-dispatcher in addition my server returns true for var_dump(\$xml->getAttributeNode("")); which is the right attribute name to get a file or the route of the file. or is there a simple way to parse the raw data? A: As you say that the "requester" who is requesting the file is your own, just remove the part and the script will work fine. This may also be a security concern. Basically it's a simple mistake. It should look like this: var request = new XMLHttpRequest(); request.open("POST", "../config.xml"); request.send(null); A small settlement in the mountains of the Slovak Republic has become the latest focus in a growing debate over the population decline that has been afflicting the country, a shrinking community of fewer than 100 people has lived in Eriška since the 15th century. It's the only remaining settlement on what was once known as the communist "golden road" of Horezica, a hill in the mountains of the Horezovo region near the border with Poland, where 500 years ago miners brought gold back from the mines in the Carpath

$\cup B_2 = \mathbb{R}^n$, B_1 is \mathcal{H}^{n-1} -rectifiable, B_2 is non-void, and $B_1 \cap B_2 = \emptyset$ then $B_1 \cup B_2$ is \mathcal{H}^n -rectifiable. By Theorem [theorem.general], it suffices to find a Lipschitz map f from B_1 onto B_2 and the existence of $\varepsilon > 0$ such that $\int_{B_1} |\text{Df}|^p \text{d}\mathcal{H}^{n-1} \leq \frac{1}{(n+1)\varepsilon} \int \mathcal{H}^{n-1}(B_1 \cap N^c)$. Since B_1 is \mathcal{H}^{n-1} -rectifiable, there exists a relatively closed set $G \subset \mathbb{R}^n$ such that $B_1 = \mathbb{R}^n \setminus G$ and such that G has finite \mathcal{H}^{n-1} -perimeter. By Proposition [prop.almostflat], there exists a Lipschitz map g from G onto B_2 such that $\int_G |\text{Dg}|^p \text{d}\mathcal{H}^{n-1} \leq \frac{1}{(n+1)^2\varepsilon} \int \mathcal{H}^{n-1}$
