Open the settings application and click on "My drawings". At the top right corner, click on "Open a CAD file". A file will be selected and the opening application will open. Autodesk's Autocad has a file extension of ".cad". (In Windows 7, for the file open and the file save dialog boxes, double-click on the file.) Open Autocad and create an empty drawing using the "File" menu (File > New). Choose the type of drawing. This is the type of drawing you need to save the model in. Call the drawing "CadModel" and set the options as follows: - Name - "CadModel" - File Name - "cadModel" - Author - "Unknown" - File Format - "All Units" Save the file. The file will be saved in a folder called "CADfiles". If you select to view your drawings, there will be a folder called "CADfiles" in the root of your documents. Autocad's is a drawing application. It is not a CAD software, therefore a CAD software needs to be opened. Open Autocad The drawing will appear in the "Recent Files" list, on the left side of the program. Open the CAD file you have just saved. The file appears in the "Recent Files" list. Close Autocad. Save it in the folder you specified earlier. The file will be saved in a folder called "CADfiles".
